

Rockwool

Rockwool is a stonewool insulation system used to create falls under any compatible membrane. The product is dimensionally stable and is available in a range of falls. Rockwool has superb acoustic qualities and is class A non-combustible having a Euroclass A1 rating.

Thermal Performance

Values are calculated for each scheme designed to ensure the required figures are achieved. Contact our technical department for further information.

Installation

Must be installed in accordance with manufacturer's recommendations. Contact our technical department for further information.

Features

- Ozone Depletion Potential of zero
- CFC, HFC and HCFC free
- Global Warming Potential <5
- Easy handling and installation

Technical Info

Board Size	1200 x 1000mm
Thermal Conductivity	0.039 W/mK
Thickness	U-value dependent
Falls	1:40, 1:60 and 1:80
Compressive Strength	Typically 80 kPa @ 10% compression
Fixing	Fully adhered Mechanical with thermally broken fasteners Ballasted
Reaction to Fire	Euroclass A1 non-combustible / A2 Limited Combustibility
